List of Contents and Author Index

Volume 26, 1988

PERGAMON PRESS

OXFORD · NEW YORK · BEIJING · FRANKFURT · SÃO PAULO
SYDNEY · TOKYO · TORONTO

INTERNATIONAL JOURNAL OF ENGINEERING SCIENCE
Incorporating: *Letters in Applied and Engineering Sciences*

Board of Editors

Editor-in-Chief: Professor A. C. ERINGEN, Solid Mechanics Program, Engineering Quadrangle, Room E-307, Princeton University, Princeton, NJ 08540, U.S.A.

Assistant to the Editor: M. GIANCOLA

Associate Editors

Professor E. S. ŞUHUBI, Istanbul Teknik Universitesi, Fen-Edebiyat Fakultesi, Muhendislik Bilimleri Bolumu, 80626 Maslak—Istanbul, Turkey

Professor J. T. ODEN, Department of Aerospace Engineering and Engineering Mechanics, The University of Texas at Austin, Austin, TX 78712, U.S.A.

Honorary Members

Professor I. N. SNEDDON, Department of Mathematics, University of Glasgow, Scotland

Professor S.-I. PAI, Institute for Physical Science and Technology, Department of Aerospace Engineering, University of Maryland, College Park, MD 20742, U.S.A.

Editorial Advisory Board

S.-I. AMARI, *Japan*
B. A. BILBY, *Sheffield*
S. R. BODNER, *Israel*
H. DEMIRAY, *Turkey*
D. G. B. EDELEN, *Bethlehem, PA*
J. HUTCHINSON, *Cambridge, MA*
H. KARDESTUNCER, *Storrs, CT*
K. KONDO, *Tokyo*
F. KOZIN, *New York*
E. KRÖNER, *Stuttgart*
G. MAUGIN, *France*
S. MINAGAWA, *Japan*
T. MURA, *Evanston, IL*
F. R. N. NABARRO, *Johannesburg, South Africa*
P. M. NAGHDI, *Berkeley, CA*
J. T. ODEN, *TX*
R. W. OGDEN, *Glasgow*
Z. OLESIAK, *Warsaw*
S.-I. PAI, *College Park, MD*
S. B. POPE, *New York*
I. PRIGOGINE, *Brussels*
K. A. RACHMATULIN, *Moscow*
K. R. RAJAGOPAL, *Pittsburgh, PA*

Publishing Office: Journals Production Unit, Pergamon Press plc, Hennock Road, Marsh Barton, Exeter, Devon EX2 8NE, England (*Tel.* Exeter (0392) 51558; *Telex* 42749). *Advertising Offices:* Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, England; Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A.

Annual Subscription Rates for 1989: Annual institutional subscription rate (1989) DM 1540.00; 2-year institutional rate (1989/90) DM 2926.00; personal subscription rate for those whose library subscribes at the regular rate (1989) DM 185.00. Subscription enquiries from customers in North America should be sent to: Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A., and from the remainder of the world to: Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, England. Prices are subject to amendment without notice.

Microform Subscriptions and Back Issues: Back issues of all previously published volumes are available direct from Pergamon Press. Back issues of Pergamon journals in microform can be obtained from: UMI, 300 North Zeeb Road, Ann Arbor, MI 48106, U.S.A.

PHOTOCOPYING INFORMATION FOR USERS IN THE U.S.A.

The Item-Fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law is paid. The appropriate remittance of $3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970. The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

The Item-Fee Code for this publication is: 0020-7225/88 $3.00 + 0.00

List of Contents

NUMBER 1

Jiin-Yuh Jang and **Joseph C. Mollendorf**	1	The stability of a vertical natural convection boundary layer with temperature dependent viscosity
S. A. Zhou and **R. K. T. Hsieh**	13	A theoretical model of eddy current nondestructive test for electromagnetoelastic materials
P. D. S. Verma, O. H. Rana and **Meenu Verma**	27	Radial oscillations of an elastic semiconductor
Naoum Daher and **Gerard A. Maugin**	37	Nonlinear electroacoustic equations in semiconductors with interfaces (relation between the macroscopic and the quasi-microscopic descriptions)
D. F. Parker	59	Waveform evolution for nonlinear surface acoustic waves
M. E. Ergüven	77	An axisymmetric fundamental solution and the Reissner–Sagoci problem for an internally loaded non-homogeneous transversely isotropic half-space
Dimitrios A. Sotiropoulos	85	Response of elastic solids to a moving discontinuity
E. Smith	95	The instability of circumferential crack growth in pipes —III. A pipe with built-in ends; the effects of (a) the type of imposed deformation, and (b) the flexibility at the built-in ends
E. Smith	103	The instability of circumferential crack growth in pipes —IV. The effect of restraints on the instability criterion
	I	Software Survey Section

NUMBER 2

Editorial	i	A toast on the eve of four birthdays
H. So and **J. Y. Huang**	111	Determination of dynamic stress intensity factors of two finite cracks at arbitrary positions by dislocation model
G. A. C. Graham and **J. M. Golden**	121	The three-dimensional steady-state viscoelastic indentation problem
Chen Yi-Heng	127	A finite notched plate stiffened by a smaller circular disk
K. Mrithyumjaya Rao	135	Longitudinal wave propagation in a micropolar wave guide

Somnath Ghosh and Noboru Kikuchi	143	Finite element formulation for the simulation of hot sheet metal forming processes
K. H. Lie and D. N. Riahi	163	Numerical solution of the Orr–Sommerfeld equation for mixing layers
S. K. Malik and M. Singh	175	Nonlinear waves on the surface of a magnetic fluid jet
R. C. Batra and Pei-Rong Lin	183	Steady state deformations of a rigid perfectly plastic rod striking a rigid cavity
E. H. Twizell, W. G. Price and Yigong Wang	193	A family of numerical methods for simulating the responses of marine structures in irregular seaways
Charles G. Speziale	211	The Einstein equivalence principle, intrinsic spin and the invariance of constitutive equations in continuum mechanics
	221	Book Review
	223	Announcements
	I	Software Survey Section

NUMBER 3

R. Drouot and G. A. Maugin	225	Polyelectrolyte solutions: equilibrium conformations of the microstructure without and with external fields
O. P. Bhutani, G. Chandrasekaran and Poornima Mital	243	On the exact solutions of nonlinear differential equations of nuclear engineering system via invariant variational principles
G. A. Nariboli	249	Bäcklund transformation of a "variable viscosity" Burgers equation
Noriko Katsube	253	The steady state fluid flow through a porous material between two infinite plates maintained at different temperatures
K. Viswanathan and U. Sharma	267	Stress concentration due to a finite rigid ribbon in the presence of a finite crack: P(SV) case
W. T. Ang	277	A cracked anisotropic elastic slab
Andrzej Służalec	285	Temperature field within induction heating element
R. S. Agarwal and C. Dhanapal	293	Stagnation point micropolar fluid flow between porous discs with uniform blowing
Hany H. Sherief and Mohammed N. Anwar	301	A problem in generalized thermoelasticity for an infinitely long annular cylinder

Letters in Applied and Engineering Sciences

O. P. Bhutani, Poornima Mittal and G. Chandrasekaran 307 On invariant solutions of the generalised Boussinesq equation

311 Announcements

I Software Survey Section

NUMBER 4

M. Şinasi Göğüş 313 The influence of vibrating plates on poiseuille flow of a binary mixture

D. L. Clements and W. T. Ang 325 Stress intensity factors for the circular annulus crack

I-Shih Liu 331 An extended field theory of viscoelastic materials

A. P. S. Selvadurai, A. J. M. Spencer and M. A. Rudgyard 343 Second-order elasticity with axial symmetry—II. Spherical cavity and spherical rigid inclusion problems

Dominic G. B. Edelen 361 On solving problems in the mechanics of solids and fluids by a generalized method of characteristics

Richard J. Bathurst and Leo Rothenburg 373 Note on a random isotropic granular material with negative Poisson's ratio

Rama Subba Reddy Gorla 385 Combined forced and free convection in micropolar boundary layer flow on a vertical flat plate

Giacomo Caviglia and Angelo Morro 393 Conservation laws in anisotropic elastostatics

I Software Survey Section

NUMBER 5

V. Sládek and J. Sládek 401 Boundary integral method in magnetoelasticity

U. G. A. Puswewala and R. K. N. D. Rajapakse 419 Axisymmetric fundamental solutions for a completely saturated porous elastic solid

H. S. Paul and M. Venkatesan 437 The torsional vibration of a piezoelectric solid cylinder of arbitrary cross section of (622) class

S. B. Pope 445 The evolution of surfaces in turbulence

G. Lebon and M. S. Boukary 471 Objectivity, kinetic theory, and extended irreversible thermodynamics

M. Kumari and G. Nath 485 Unsteady three-dimensional boundary layer flow over a flat plate with attached cylinder

J. P. Jarić and E. S. Şuhubi 495 Griffith criterion for brittle fracture in micropolar continuum

Letters in Applied and Engineering Sciences

S. N. Majhi and L. Usha 503 Modelling the Fahraeus–Lindqvist effect through fluids of differential type

I Software Survey Section

NUMBER 6

A. J. Willson and P. J. Myers 509 A generalisation of Ko's strain–energy function

E. Ukeje 519 The relativistic theory of wave front propagation in non-heat conducting thermoelastic materials—variation of amplitude of waves

A. K. Pramanik and S. R. Majumdar 549 The effect of surface tension on the reflection of gravity waves from a vertical cliff

F. Delale and F. Erdogan 559 Interface crack in a nonhomogeneous elastic medium

N. Şandru and G. Camenschi 569 A mathematical model of the theory of tube drawing with floating plug

Reaz A. Chaudhuri and Kamal R. Abu-Arja 587 Exact solution of shear-flexible doubly curved anti-symmetric angle-ply shells

Dominic G. B. Edelen 605 Construction of autonomous canonical systems when the Hamiltonian depends explicitly on time

John G. Papastavridis 609 On the nonlinear Appell's equations and the determination of generalized reaction forces

Ioan R. Ionescu and Bogdan Vernescu 627 A numerical method for a viscoplastic problem. An application to wire drawing

Da Yu Tzou 635 Qualitative assessment on the three dimensional configuration of the material boundary layer and the core region

I Software Survey Section

NUMBER 7

K. R. Rajagopal and M. M. Carroll 649 A note on an unsteady viscometric flow

R. Amodeo and N. M. Ghoniem 653 Dynamical computer simulation of the evolution of a one-dimensional dislocation pileup

T. K. Chadha and Rajneesh Kumar 663 Steady-state axisymmetric problem in micropolar thermoelastic half-space with stretch

S. Krishnakumar	673	Large deflections of simply supported isosceles triangular plates subjected to edge shear and compressive loading
P. J. Aston and **J. R. Whiteman**	687	Analysis of two-way snap of shells of revolution
R. A. Meriç	703	Sensitivity analysis of functionals with respect to shape for dynamically loaded nonlocal thermoelastic solids
Jon M. Bass and **J. T. Oden**	713	Numerical solution of the evolution equations of damage and rate-dependent plasticity
R. C. Batra and **T. Gobinath**	741	Steady state penetration of compressible rigid perfectly plastic targets
Abdullah Shidfar	753	Identifying an unknown term in an inverse problem of linear diffusion equations
Y. C. Angel	757	On the reduction of elastodynamic crack problems to singular integral equations
		Letters in Applied and Engineering Sciences
Mehrdad Massoudi	765	Stability analysis of fluidized beds
	I	Software Survey Section

INTERNATIONAL JOURNAL OF ENGINEERING SCIENCE
Incorporating: *Letters in Applied and Engineering Sciences*

Aims and Scope

The *International Journal of Engineering Science* will contain original research pertaining to the application of the physical, chemical and mathematical sciences to engineering. The highest priority will be given to those contributions concerned with the cross-fertilization of these fields and research in the coupled regions of mechanics, electricity and magnetism, thermodynamics, physical chemistry, both from continuum and molecular points of view. Applied research involving recent development are welcome in such interdisciplinary areas as biomechanics, system theory, energy and approximation theory as applied to basic problems in engineering science. The papers may be theoretical, experimental, or both. Only papers of the highest quality that contain original ideas and original research at the level established by the best work in the field will be published. The application of physical principles to engineering research will always be kept in the forefront. Abstract mathematics with no foreseeable application to engineering science belongs to journals cultivating pure mathematics. Papers containing irrational approximations or aimless tests having no foundations are discouraged.

When outstanding new advances are made in novel areas, the editor may invite papers of an expository or tutorial nature.

The Journal will also contain some news items on technical meetings, symposia, etc. concerned with research work in engineering science. From time to time a listing and the review of selected groups of significant papers and books shall also be supplied.

Note. Opinions advanced in the papers published in this journal are to be understood as individual expressions of their authors and not those of the Board of Editors, the Editorial Advisory Board or the Publisher.

Notes for Contributors

1. The Editors will be pleased to receive contributions from all parts of the world and manuscripts for publication should be sent in triplicate to the appropriate members of the Board of Editors or the Editorial Advisory Board.

2. Only papers not previously published will be accepted and authors must agree not to publish elsewhere a paper submitted to and accepted by the Journal. In the case of rejected papers it is the policy of the Journal not to return the manuscript to the authors.

3. The languages of the Journal are English (preferred), German and French.

4. *Manuscripts should be typed with double spacing and submitted in triplicate with ample margins.* Pages should be numbered consecutively.

5. Manuscripts should begin with the title of the article, the author's name and the address from which the communication comes. In the case of co-authors, respective addresses should be clearly indicated, as well as which author is to receive correspondence and proofs for correction. It would be appreciated if authors would notify the Publisher of any change of address which occurs whilst their paper is in the process of publication.

6. The essential contents of each paper should be briefly recapitulated in an abstract.

7. Half-tone illustrations are to be restricted to the *minimum* necessary. They should accompany the script and should not be included on manuscript pages. Line drawings should be originals and include all relevant details; no photo-prints should be sent. Photographs should be enlarged sufficiently to permit clear reproduction in half-tone. If words or numbers are to appear on a photograph two prints should be sent, the lettering being clearly indicated on one print only. Drawings, etc. should be about twice the final size required and lettering must be clear and "open", and sufficiently large to permit the necessary reduction of size for publication.

8. In the interest of economy and in order to avoid the introduction of errors, tables will be reproduced by photo-offset means directly from the authors' typed manuscripts. The guidelines detailed below should be followed:

   (a) Page size should be 8.5 × 11 in. (or 21 × 30 cm).

   (b) Large or long tables should be typed on continuing sheets.

   (c) Table headings should be typed on separate sheets but identifying numbers should be placed in the upper right-hand corner of each sheet of tabular material.

   (d) Original typed tables are required.
   It will be the author's responsibility to prepare his tables in accordance with this procedure as no facilities exist at the Editorial Office for retyping. In case of difficulty please consult the Photoreprographic Unit of your institution.

9. Figure legends, table headings and table footnotes should be typed on a separate sheet and placed at the end of the manuscript.

10. References to published literature should be quoted in the text in square brackets. References should be listed together at the end of the paper in numerical order. Double-spacing must be used throughout. Journal references should be arranged thus:

    [1] S. A. TOBIAS, *Proc. Instn Mech. Engrs* **173**, 474 (1959).
    [2] A. A. ANDRONOV and C. E. CHAIKIN, *Theory of Oscillation*. Chap. 5. Princeton University Press (1959).

11. All mathematical symbols may be either handwritten or typewritten but no ambiguities should arise. Greek letters and unusual symbols should be identified in the margin. Distinction should be made between capital and lower case letters; between letter O and zero; between the letter l, the number one and prime; between k and kappa. A vector will be printed bold face and to indicate this the letter should be underscored with a single wavy line. The numbers identifying mathematical expressions should be placed in parentheses.

12. Nomenclature should conform to that most frequently used in the engineering field concerned.

13. Reprints can be ordered on a reprint order form which will accompany proofs.

14. The original manuscript and diagrams will be discarded 1 month after publication unless the Publisher is requested to return original material to the author.
